

**MECHANICAL ENGINEERING**  
**Supplemental Document**  
**Research Interest Area**

Mechanical Engineering encompasses many different fields of research. The following is a list of research areas in which the University of Delaware, Mechanical Engineering Department focuses. Also, please note that many research projects are interdisciplinary.

1. Please indicate which area(s) you are most interested in by inserting a **√**.
2. You may select more than one research area.
3. Feel free to add any additional information that you feel will help us match you with the proper research areas.

<b>√</b>	<b>Research Area</b>
	Biomedical Engineering
	Clean Energy and Environment
	Composites and Advanced Materials
	Nanomaterials and Nanotechnology
	Robotics and Control and Nonlinear Dynamics
	Fluid Mechanics
	Solid Mechanics
	Thermodynamics and Heat Transfer
	Other (please explain below)
